Chapter 5: Tax Rates & Tax Levies

In this section, we will discuss the following:

- *The role of Certification of assessed values by local officials*
- *The amount of annual minimum levy increases.*

TAX RATES AND TAX LEVIES

In terms of technical and administrative problems, the most difficult part of the budget process is establishment of an adequate tax rate and tax levy. This is particularly difficult because maximum levy limitations are in place for each County. The maximum levy limitation controls the amount of property tax levied by a County, thereby placing a cap on revenues available through property tax.

$$\text{Tax Rate} \times \text{AV} = \text{Tax Levy or Tax Levy} / \text{AV} = \text{Tax Rate}$$

When determining the levy required for a specific calendar year, the county is required to subtract from projected expenses any amounts of miscellaneous revenue that will be generated in lieu of property tax. The difference, or amount remaining, reflects what is required to be raised in property tax. If the levy, (line 10, Form 4B) remaining after subtraction of miscellaneous revenues is greater than the maximum levy limitation, a County has two options:

- 1) an excessive levy appeal, if applicable; or
- 2) a reduction in line item expenditures during the current or proposed calendar year.

Unless the County is pursuing an excessive levy appeal for budget purposes, the County will automatically be required to reduce current year or ensuing calendar year expenses. A budget reduction is both a financial and political process. The financial aspect covers the requirement in Indiana for a balanced budget, operations within a maximum levy limitation, and avoidance of operating in the red. The political aspects of a balanced budget are evident. No discussion will follow on this area.

In preparing tax rates, local officials rely on the certification of assessed values by the County Auditor. The County Auditor works with the County Assessor to solidify values that represent the assessed valuation of all real and personal property within the county reported by the township assessor. The State Board of Tax Commissioners provides the Auditor and other officials data on valuation of public utilities and on specific taxation limitations.

In preparing tax rates, local officials rely on the certification of assessed values by the County Auditor.

This information is used by each local official in the determination of tax rates and levies for the ensuing calendar year. As covered in Chapter 3, the information should be received no later than August 1st. The County Auditor compiles the following information for use by each taxing unit.

- Current assessed valuations.
- Estimated December property tax collections.
- Estimated December excise collections.

Prior three years assessed valuation growth.

Any other information deemed important.

Auditor's are encouraged to provide information on the amount of contested assessed valuation withheld due to pending appeals.

The previous section elaborated on the importance of accurate assessed values and the role of local officials in the certification process.

Property Tax Levies

Counties are permitted growth under the current tax package. A minimum of a five-percent increase in levy is provided each year. Counties experiencing more rapid growth may qualify for a growth rate between five and ten percent. The excessive levy appeal procedure described in this manual also allows for levy growth in excess of the norm. Proper procedures must be followed to attain this special exception.

A minimum of a five- percent increase in levy is provided each year.

The maximum levy limitations are determined by the State Board of Tax Commissioners and represent the maximum amount of property taxes that may be raised in a given year. The information is furnished to County Auditors prior to preparation of ensuing calendar year budgets. County units have one maximum levy worksheet. This worksheet encompasses the county operating budget. The estimate of funds to be raised through property taxes may not exceed the maximum levy established for the county operating budget. This levy limitation includes any levies for County general, local road and street and other County funds. The County Auditor must balance the needs of the County with the levy limitations.

Determination of the county's proposed property tax rate is calculated on the 16-line statement or Form 4B, Estimate of Funds to be Raised. The Estimate of Funds to be Raised is the property tax levy desired for each fund. Step 1 involves determining the assessed valuation of taxable property within the county's jurisdiction. This assessed valuation is provided by the County Auditor and certified to the State Board of Tax Commissioners. The same calculation is used for each fund with a property tax levy.

Step two requires the County Auditor to take the estimate of funds to be raised on Line 16 of Form 4B and divide that amount by the total assessed valuation for the taxing district. This figure is then multiplied by 100 to determine the tax rate needed to support the fund.

For example: Estimate of funds to be raised is \$100,000

Assessed valuation is \$160,000,000

Tax rate: $100,000 / 160,000,000 = .000625 (100) = .0625$ tax rate

(To check your work $.0625 \times 1,600,000.00 = 100,000$)

The tax rate calculated (.0625) represents the amount of property tax needed to support this particular fund. The same calculation is made for all funds with a property tax levy.

Once the County Auditor determines the tax levy for each fund, he must compare whether the funds are controlled or not controlled. Controlled levies fall under the maximum levy limitation. To ensure that the county is within its maximum levy limitation, the County Auditor adds the sum of fund levies to compare that total against the maximum levy figure.

If the levies exceed the maximum certified by the State Board of Tax Commissioners, the County may have to consider making budget cuts for the ensuing year or reductions in line 2 current year remaining appropriations.

Summary

Chapter 5: Tax Rates & Tax Levies

In this section, we have discussed the following:

- *In preparing tax rates, local officials rely on the certification of assessed values by the County Auditor.*
- *The County Auditor is required to provide all taxing units with an Auditor's Certificate on or before August 1 of each year.*
- *A minimum of a five- percent increase in levy is provided each year.*
